

# START THE CAN BAN

**Imaginations crushed, rainbows leaving and hopes dying. Many beautiful animals have already had already fallen victim to this devious chain. 80% of our wonderful unique animal will be extinct by 225, children's dream crushing. Having innocent animals blood on your hands how could you live whilst they are being slaughtered, how?**

**Gone and forgotten forever, the grim reality of our depressing future. There have been many examples of this over the years from the Tasmanian tiger to other things that are going on right this second. Imagine your grandchildren not knowing what are you talking about, would you kill these beautiful innocent majestic creatures?**

**Cold days, dark sky and sad kids, unicorns are a large source of the world's happiness and rainbows but taking these beautiful sights will leave our eye sockets. Also plants will suffer with this lack of sunlight they will foreshore die; even humans will suffer from this with lack of nutrients from natural foods. Blood guts and gore at your door.**

**Tourists, money, happiness, three massive Ideas that could change Australia forever, save the planet with unicorns how? Well we could switch planes with unicorns also tourism we could have unicorn rides.**

**Saving the planet and saving unicorns. So if you ask I think we start the ban!**
